An informative, one-day, advanced level seminar

At FM Global, we develop sprinkler protection concepts, which address the individual needs of our insured clients.

This seminar requires an existing sound technical knowledge of the general principles of automatic sprinkler system design and will help you to correctly design automatic sprinkler systems, fed from well-arranged water supplies to the latest FM Global Data Sheets.

Seminar topics

- Factors which impact the design of sprinkler protection
- Designing various sprinkler systems for non-storage and storage occupancies
- Water supply design considerations
- Preparing for plan review
- How to apply the latest FM Global Data Sheets 2-0, 3-2, 3-26, 8-1 and 8-9

Target audiences

- Sprinkler contractor personnel
- Project managers and planners for designing automatic sprinkler systems
- Insurance broker technical surveyors
- Anyone involved with designing new sprinkler systems at their facility

Registration

Securing business – maintaining values

Our insured clients know that risk mitigation and loss prevention will ensure to maintain uninterrupted business operations and financial stability of their company.

FM Global is convinced that ongoing education and training are fundamental elements of a strategic approach to minimize risk. We would like to include you in that process through our specific seminar offerings.

Our seminars are delivered by well-experienced trainers, who bring in their knowledge built through numerous loss prevention evaluation field visits.

We look forward to your participation!
